EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In line 2 of claim 14 "claim 1" has been changed to - - claim 2 - -.

In the title of the invention "and a method of designing the same" has been deleted.

REASONS FOR ALLOWANCE

The amendment filed on June 29, 2005 has been entered. Claims 1-11 have been amended, claim 12 has been cancelled and new claims 13 and 14 have been added.

The terminal disclaimer filed on June 29, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,480,777 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claims 1-11, 13 and 14 are allowed.

The following is an examiner's statement of reasons for allowance: None of the prior art of record shows or suggests a control apparatus for controlling a torque phase

of an up-shifting operation in an automatic transmission having plural friction engagement elements comprising a slip amount calculating means, a judging means, a target slip amount calculating means, a disengaging side controlling means and an engaging side controlling means which function in the manner required by each of the independent claims 1 and 2, and particularly wherein the disengaging side controlling means starts to perform an integral-proportional feedback control so as to substantially match the calculated slip amount with the calculated target slip amount for restraining over rotation of the turbine runner (claim 1) or input shaft (claim 2) due to the up-shifting operation when the calculated slip amount is judged to be in excess of the predetermined threshold value by the judging means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lockhart et al. '723 discloses a control apparatus for controlling a torque phase of an up-shifting operation in an automatic transmission. However, the apparatus of Lockhart differs from the presently claimed invention in that during the torque phase the pressure of the on-coming clutch is controlled so as to maintain a constant output torque.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard M. Lorence whose telephone number is (571) 272-7094. The examiner can normally be reached on Mondays through Fridays from 9:00AM to 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles A. Marmor can be reached on (571) 272-7095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
